This premium infrared thermometer is an essential tool for every pizza party and allows any pizzaiolo to quickly and accurately check the surface temperature of a pizza stone with ease.

Features & Benefits

- **Infrared thermometer with laser guide**
A one-click trigger activates the laser guide to measure any surface temperature in the range of -22 °F (-30 °C) to 999 °F (550 °C) and displays a Fahrenheit or Celsius reading in seconds.
- **Backlit Color LCD Screen**
Easy to read and intuitive user interface.
- **Color-coded temperature ring**
Visualize baking stone temperature before launch by quickly consulting the 12-segment color ring that changes based on temperature.
- **Temperature scan mode**
Scanning the baking stone from front to back takes 3 temperature readings: A minimum, a maximum and the average of all readings recorded across the stone.
- **Effortlessly switch between preset viewing options**
Rotate between Standard, Essential and Emissivity view to customize the details on display to suit anyone from new pizza makers to seasoned pizzaioli.
- **Convenient hanging loop**
Suspend from an Ooni Table Hook kit, or belt loop, with the removable hanging loop attachment.
- **Sleek design upgrades**
Enjoy exciting design upgrades like an ergonomic soft-grip handle and an intuitive display screen that elevates the user experience.

Infrared Thermometer with
laser Guide and backlit
colour LCD Screen

Hang loop at base to keep the
device always at arms reach

High quality, hard wearing
thermometer design that
matches the level of the
Ooni oven range
